Agenyi Gideon Enemona

FRONTEND DEVELOPER

PROFESSIONAL SUMMARY

Frontend Developer with hands on practice building web interfaces using HTML5, CSS3, JavaScript, React, and Tailwind CSS. Developed a university-focused Assignment of Responsibility (AOR) management application using React and Vite on the frontend, supported by Node.js, Express.js, and MongoDB. Familiar with Git and GitHub, with an Information Technology foundation and continued practice through web development projects.

WORK EXPERIENCE

Frontend Development Intern | P3 Consulting Limited
May 2025 – November 2025

- Gained practical exposure to frontend, API integration and motion UI

FEATURED PROJECT

Assignment of Responsibility (AOR) Management System
Federal University of Technology, Minna (FUT Minna) | Final-year academic project (site deployed and in use now)

- A web-based application designed to manage academic staff AOR submissions and approval workflows in a university environment.
- Organises the workflow for lecturers, Heads of Department, Deans, and Directors, including form management, submission tracking, and multi-level review and approval.
- Uses React, Vite, and Tailwind CSS for the frontend, with Node.js, Express.js, and MongoDB supporting the application backend.

Application: *AOR Management System (authorised access)*

OTHER PROJECT EXPERIENCE

E-commerce website practice projects
Hands on e-commerce website practice projects developed to reinforce web development concepts and strengthen practical skills.
GitHub: *github.com/Enesgid*
